Garden Maintenance

We keep your garden to professional standards all year round so you can tick this off your mind, and just think about that summer garden party you were looking forward to.

How we work.

We come to you, say hi! , check the garden, and quote the visits keeping your budget in mind. Our quotes are free of charge.

What we recommend.

We normally recommend minimum 2 visits/month from March until November, and to reduce it during winter time. There is no contract, meaning you call us, we come.

Price.

- £30/hr per gardener.
- Garden waste: £20/bag
- Minimum charge: £60

Good to know.

- Typical visits are 1hr. Recommended time might change depending on the garden size and how long it's been between visits.
- The 1st visit usually takes longer.
- Pre book 10 visits, get the 11th free.

What's included.

Think of this task as giving your garden a makeover! It typically involves lawn mowing, trimming shrubs and hedges, weeding borders, watering outdoor plants as needed. We welcome any other requests you may have, provided they don't alter the layout of your garden (as that would fall under landscaping).

What is not included.

Garden waste: We charge £20 per bag we remove, as we incur disposal fees and this pays for our time to dispose of it.

To avoid or reduce this charge, you can either take the waste to a recycling centre yourself or apply for a green bin sticker (about £100 a year).

OUR BEST SELLER

1 hour garden visit every 2 weeks.
£120 a month

Garden Clearance

Sometimes life gets in the way and in the meantime... nature literally takes over! We'll do the hard work and give you and your garden a chance to reset.

Clearance VS Maintenance

A garden clearance needs to be carried out when the garden has not been touched for a long time. It is a big clean that resets the garden. Once that's done we can maintain it regularly and apply the hourly maintenance rates.

How we work.

We come to you, (say hi!), check the garden size and estimate the job. In most cases, we provide you with a verbal quote on the day.

Price.

- Minimum charge: £200
- Half day rate: £300
- Full day rate: £500

Good to know.

- Prices are quoted per job and not per hour.
- The clearance fee is separate from the waste fee. Bags will be counted at the end and added to the final invoice.

What's included.

It's a complete clean up. Bushes, dead plants and garden accumulation are cleared, shrubs & hedges are reshaped, weeds and grass trimmed, garden restored to original state.

What is not included.

Garden waste: We charge £20/bag we remove, as we incur disposal fees and this pays for our time to dispose of it.

For some clearance jobs, we highly recommend a skip hire. You can hire it yourself or we can do it for you.

CASE EXAMPLE

• Minimum clearance charge	£200
• Waste removal service (x8 bags)	£160
• TOTAL	£360

Astro Turf Installation

Good looking grass is time consuming and quite expensive. Swapping it out for astro turf will let your kids and dog enjoy the fun, minus the mud!

How we work.

We come to you to chat through what you would like done, take measurements, and note any other important details. We work with 3 types of artificial grass, from budget friendly options through to luxury lawns.

On the day, we bring all 3 grass samples with us so you can see and feel them properly before choosing what you like best. Once you have decided, we will provide a clear quote covering both materials and labour.

If you are unsure about which grass to go for, we are more than happy to provide alternative quotes so you can compare and choose at your own pace.

Our selection.

Budget £10/sqm Premier £15/sqm Luxury £25/sqm

Installation.

We take pride in doing things properly and that starts with how we install your astro turf. Every step in our process helps make sure your new lawn looks great, feels right, and stays in good shape for years to come. When comparing prices with other gardening companies, it is always worth checking that all of these steps are included.

We start by clearing the garden and removing the existing lawn back to soil level. A compacted base of crushed granite and a weed membrane is then installed. The artificial grass is laid and secured around the edges, before sand is brushed in to add weight, protect the turf, and keep it looking its best.

Irrigation system

Whether you are away or the weather turns dry, your garden should not suffer. We install discreet irrigation systems that look after every plant, so it is one less thing on your mind.

How we work.

We will visit to talk through your garden, take measurements, and check the water pressure from your garden tap. This helps us design the right system and confirm how many sprayers can be installed.

Installation costs.

From £150 (small gardens) up to £500 (big gardens, front + back gardens etc.)

Our Irrigation.

Our irrigation systems use micro sprayers that deliver a fine, even spray of water, covering an area up to 2 meters in radius.

They are ideal for large flower beds and borders, vegetable patches, nurseries and greenhouses.

Estimations per garden size.

Small (e.g., front garden): £100-£150
Medium (up to 200 sqm): £150-£250
Large (200 sqm+): from £300

Our water timers.

A water timer is key for making your irrigation system fully independent. It runs your watering at the best times, typically morning and evening, ensuring your plants thrive even in dry spells.

You can choose a standard timer or upgrade to a smart timer, which connects to an app and monitors the weather so your system will not water when it is raining.

Timers costs.

Standard water timer: from £30*
Smart water timer: from £60*

*Price will vary depending on the amount of outlets needed.

Design & Landscaping

You woke up creative and you only have that idea in mind: something in your garden needs to change.

We Design.

Once we have taken all the notes and measurements we need, we put together a clear and friendly proposal for you. This includes a rough garden drawing and a mood board with ideas and inspiration to help you visualise how the space could look. There is no obligation to go ahead, and if you do decide to proceed, the cost of the proposal is deducted from your final quote.

Proposal drawing & quote: £100

We Create.

Once the quote is accepted, we get started on bringing your garden to life. We take care of sourcing all plants and materials, installing fences, and creating new beds, paths, and ponds. At the moment, we do not build sheds or patios ourselves, but we work with trusted subcontractors who handle this part before we step back in to complete the garden.

Labour costs. 2 Gardeners.

Half day: £300

Full day: £600 (£500 in winter)

WildBulb LANDSCAPING QUOTE	
• POND (3 days) Digging and creating pond, installing pump & filter.	• With Pump & Filter: £3140 • Electrical work • Without pump/filter: £2960

DISCLAIMER * The total cost of plants includes small, medium and large specimens. Plants will be selected based on their position in the garden and placed where they'll look their best. * Please note that the price of materials and plants may vary depending on availability. Any changes to pricing will be discussed with you beforehand.	

Pressure Washing

Your driveway may sparkle so much, your neighbours will think you're hosting a red carpet event.

How we work.

We'll visit you to discuss the work required. Once we agree on the surface to be treated, we'll provide a quote and arrive with all the necessary equipment to carry out the job.

Some jobs already have a fixed price, please see details below.

Please note that we will need access to tap water and electricity.

Fixed Price Jobs.

Driveway: £150 (+sand cost if needed)

Patio: £80

Labour costs. 1 Gardener.

£30/hour

Half day rate: £150

Full day rate: £300

Minimum charge: £60

The treatment.

Pressure washing is an effective way to clean outdoor surfaces, removing dirt, algae, and grime.

It restores the appearance of driveways, patios, and garden furniture, prolonging their lifespan and saving on costly replacements.

For brick driveways, we return the following day once everything is dry to brush sand back into the joints.

Our Equipment.

We use electric pressure washers, and occasionally petrol powered ones, depending on the job. We do not use any chemicals, only the pressure of the water. This means some areas, especially those in shaded spots, may not come up as clean as others. For heavier duty cleaning, we recommend using a specialist pressure washing company.

Lawn Treatment & Turf

Don't let weeds win the battle! An annual lawn revitalisation can transform your lawn into a vibrant, lush carpet -free from the sponginess of moss. We use 2 methods.

LAWN SEEDING. A cheaper option, but longer process.

SCARIFYING

We remove dead grass, moss, and open the soil surface.

COLLECTING MOSS & THATCH

We remove moss and debris so the lawn can breathe.

SOIL & GRASS SEEDING

We add fresh soil and sow new grass seeds to encourage healthy growth.

RESULT

The grass will initially grow patchy, so we return a couple of times to overseed, and after around 4 months the lawn becomes thick and healthy again.

TURFING. More expensive, but immediate result.

TAKING LAWN MEASUREMENTS

We measure the area carefully to order the correct amount of turf.

SCRAPING OLD LAWN

We remove and dispose of the existing lawn to prepare a clean base.

TOP SOIL & TURF APPLICATION

We add fresh top soil and level the ground to create a smooth surface.

RESULT

An instant green lawn that looks neat straight away and fully settles over the following weeks.

Painting

We do not just garden, we also transform and protect your outdoor woodwork. From decks to sheds and fences, a fresh coat makes everything look sharper and last longer.

How we work.

We start by visiting your garden to assess what needs painting and discuss the look you would like to achieve. We then agree on colours and finishes and send you a clear quote for the work.

You are welcome to supply the paint yourself, or we can advise on the best products and carry out the job using your chosen materials.

Labour costs. 1 Gardener.

£30/hour

Half day rate: £150

Full day rate: £300

What price to expect. (Estimates)

Regular shed: £150

Fence: £300

Wooden Deck: £250

Trough: £60

Balcony: £300

Offer for customers only.
Delivery charges may apply.

Terms & Conditions

The fine print that nobody reads but everyone agrees to. They keep things fair, clear and drama-free for both of us.

Late cancellation.

Cancellations within 24 hours of the scheduled visit will incur a £30 fee.

Payments.

We accept bank transfers and cash only.

GARDEN MAINTENANCE: Payment is due upon completion of the job, unless otherwise agreed.

LANDSCAPING SERVICES: Full payment is requested in advance, unless otherwise agreed.

Minimum charge.

Our minimum charge for any service is £60. This covers our expenses to come to you

Use of utilities.

Access to electricity and water is required for some services. Please ensure these are available during the visit.

Waste removal.

Garden waste removal is charged at £20 per bag unless agreed otherwise. You can opt to dispose of the waste yourself to avoid this fee.

Weather conditions.

Services may be rescheduled in the event of poor weather conditions that make it unsafe or impractical to work.

Liability.

While we take every care during our work, we are not liable for damage caused by pre-existing issues, such as unstable garden structures or faulty equipment.

Liability insurance.

WildBulb Gardens holds comprehensive liability insurance to cover any potential damage or accidents. All our gardeners are fully covered while carrying out work on your property.

Quotes & additional work.

Quotes are valid for 15 days and cover the agreed scope of work. Any additional work requested will be quoted and agreed upon separately.
