GARDEN MAINTENANCE

We keep your garden to professional standards all year round so you can tick this off your mind, and just think about that summer garden party you were looking forward to.

How we work

We come to you, check the garden, and quote the job keeping your budget in mind. We usually recommend **weekly or fortnightly visits** throughout spring/summer, and reduce it towards winter. There is **no contract**, which means that you are free to freeze visits during the low season.

Price

£30/hr per gardener.
Garden waste: **£15/bag**

Weekly visit minimum charge*: £45
Monthly visit minimum charge*:
£60

*Applies only from April to September.

What's included

Think of this job as giving your garden a makeover! It generally includes **lawn mowing, cutting back shrubs/hedges, weeding borders, watering outside plants on demand** and any other requests that you may have and that do not modify your garden's shape (because that's landscaping).

What is not included

Garden waste. We charge £15 for every bag that we carry around. It is because we have to pay to dispose of it. In order to avoid or reduce this charge, you can either bring the waste yourself to a recycling centre, or apply for a green bin.

GARDEN CLEARANCE

Sometimes life gets in the way and in the meantime... nature literally takes over! We'll do the hard work and give you and your garden a chance to reset.

The difference with garden maintenance

A garden clearance needs to be carried when the garden has not been touched for a long time. It is a **big clean that resets the garden**, before we can maintain it regularly.

Prices vary depending on the size and how big it has grown. Rates are set for the job and aren't per hour.

Price

From **£100**

Garden waste: **£15/bag**

What's included.

It's a complete clean up. **Bushes, dead plants and garden accumulation are cleared, shrubs & hedges are reshaped, weeds and grass strimmed, garden restored to original state.**

What is not included

Garden waste. We charge £15 for every bag that we carry around. It is because we have to pay to dispose of it. In order to avoid or reduce this charge, you can either bring the waste yourself to a recycling centre, or apply for a green bin.

SOFT LANDSCAPING

You woke up creative and you only have that idea in mind: something in your garden needs to change.

Why “SOFT” landscaping

As opposed to “HARD” landscaping, soft landscaping (or softscaping) is the **renovation or upkeep of soft materials** in an outdoor space. The soft materials include turf, trees, grass, shrubs and flowers. We use various techniques, such as **planting, grading, weeding, trimming, digging and spraying.**

Price

Quote on demand.

How we work

We come to you, **agree on what needs to be done**, take measures and other various data, and **send you a free quote** for both materials, machinery rental, and labour.

If you prefer to source the materials on your own, then we can quote you only for the labour and machinery rental.

TREATMENTS & PRESSURE WASHING

We offer different treatments for your lawn, against weeds and to improve your plant's health. Pressure washing is also available on demand.

The treatments

We can carry a range of different treatments for your garden. It includes: **seasonal lawn treatments, moss scarifying, weed killing, and plant fertilising.**

For your patio, we offer **pressure washing**, which will **remove any moss and restore the natural colour of the stones/brick.**

Price

Treatment from **£15**
Pressure washing: **30/hr***

*Minimum charge: **£45**
